frying, and in connection with this the elements of the chemistry of digestion are taught. Then comes a lesson about how to boil rice, and oatmeal with the simpler facts about the chemistry and of cereals and flour.

Eggs, their composition and methods of cooking take up another lesson. Rice and milk form the subject of another lesson. Yeast, baking powder, bread making, biscuit making and the variety of matters connected with these take up two or three lessons. Fruits, such as bananas and coconuts and how to prepare them, and tea, coffee and cocoa making take up another. Potatoes and taro, macaroni soups and soup making, cooking vegetables, fish and meat, are other subjects. One lesson is given to showing how to know a young chicken, how to draw and clean a chicken, how to sever the parts, and how to cook them. There is another lesson for pork, and another lesson for desserts.

This outline as prepared by Miss Bell is to be printed at Lahaina, and enough copies are to be struck off to supply all that are needed in the schools where the subject is taken up.

REV. ALBERT ERDMAN, D. D.

It is a great pleasure to welcome Dr. and Mrs. Erdman to the Island of Maui. Dr. Erdman is to supply the pulpit of the Kahului Union Church for a few months, until a permanent past or can be secured.

For thirty years or more, Dr. Erdman has been pastor of the Presbyterian Church of Morristown, New Jersey. This church is one of the largest and most important suburban churches in the vicinity of New York City.

Dr. and Mrs. Erdman have two Missionary sons, one in Syria and John P. recently in Japan, but permanently situated at Waialua, Oahu. We are to be congratulated in having the Erdmans with us.

PUUNENE LINES.

Miss Guisenodoff formerly one of the staff of nurses at the Puunene Hospital has resigned her position and is at present the guest of Mr. and Mrs. Wm. Searby. She intends leaving the Island per Kinau on Friday.

Mr. and Mrs. Geo. Keeney returned from the mountains on Thursday after an enjoyable vacation.

W. F. J. Dale returned per Kinau after three weeks vacation in Honolulu.

Mr. V. L. Boeck leaves for Honolulu on the Kinau to serve on the Federal Jury.

For New Schools and Teachers' Cottages.

In his letter to Governor Frear Superintendent of Public Instruction Babbitt gave some very interesting information regarding, not only the school needs in the matter of schoolhouses and teachers' cottages, but as to the plans which have already been thought out by the department and are being thought out. His letter gives evidence that the head of the department has and is gaining a very comprehensive knowledge of the needs of the schools throughout the Territory the property of the department, and in what way it can be bettered.

KAUAI.

Hanapepe—New 8 or 10-room schoolhouse and teachers' cottage to accommodate 3 or 4 teachers, \$7500. If an entirely new school is erected, lumber from the old buildings can probably be utilized for the erection of the cottage. It will be necessary to obtain more land and I shall at once start negotiations to obtain same.

Total for Kauai, \$12,500.

OAHU.

Waimanalo—Teacher's cottage, \$1500. Manager Chalmers of Waimanalo plantation has agreed to allow the department an additional strip of land along the makai side of the school premises. It will probably also

be necessary to enlarge the present school building.

Kailua—Combined school and cottage, \$2500. Probably on the plan of the Nahiku school and cottage. It will not be necessary to erect this building before next year.

Wahiawa—New 1 or 2 room schoolhouse, \$2500. The Wahiawa Settlement Association has volunteered to give this department a fine lot providing we erect a school building to cost not less than \$1500.

Waianae—New 4 or 5 room schoolhouse and cottage, \$5000. Cottage to be built of material on present school premises. Before deciding on the number of rooms, I shall obtain information relative to the probable attendance. I am writing today for this information. The plantation at Waianae has agreed to make an exchange for a new school lot in place of the old one. I have already been over the ground and think the new location will be a desirable one.

Honolulu—New 5 or 6-room schoolhouse, \$5000. Am writing today for information as to the probable attendance. Ewa plantation has agreed to allow us additional land on the Waiiki side of the present school premises.

Waipahu—Two additional rooms, \$1500. These are greatly needed and should be put up at once. The present school premises are sufficiently large.

Manoa—Construction of 1-room building in place of 2 small rooms now on the school premises, \$1500. This work need not be done until the summer vacation.

Total for Oahu, \$21,250.

MAUI.

Ulalo—Teachers' cottage, \$1800. This was allowed by the Legislature out of the repair fund we have been able to take one of the cottages from Haou and erect a cottage at Ulalo so that this will not be needed.

Keanae—New 2 room schoolhouse and cottage, \$3500. It is very desirable that we obtain a new site at Keanae and I have one in mind which I hope can be obtained on the Nahiku side of the Keanae gulch.

Huelo—Teachers' cottage, \$500. It is proposed to erect this from the old lumber on the old school lot. We have here a new schoolhouse and a new lot well situated.

Paia—New 8 or 10 room schoolhouse and teachers' cottage, \$11,000. I asked originally for \$20,000 for this schoolhouse and hope to put up a concrete building. The Legislature, however, took \$10,500 from my estimates for the Island of Maui reducing this amount for Paia to \$10,000. Of the \$1800 saved from Ulalo, I would still have available an extra \$1000. I trust that by saving in other directions I may have still more to add for this school.

Keokea—Teachers' cottage and additional 1 or 2 rooms for the school building, \$3300. It is desired here, if possible, to obtain a new lot and move the present school buildings.

Kailua—2-room schoolhouse with possibly 1 teacher's apartment on land to be given by the Maui Agricultural Company, \$2000.

Kaunapali—2 room schoolhouse and teachers' apartments, \$2500. I do not feel sure that this schoolhouse is necessary and should not proceed with building of same until more information is obtained.

Olowalu—New 1-room schoolhouse and teacher's apartments, \$2000. The present school lot here is a very undesirable one and a new lot has been selected by the Normal Inspector and the plantation manager which will, I think, be a valuable very shortly.

Kalaupapa—New 1-room schoolhouse \$1000. We have here a beautiful school lot and the building should be erected at once.

Kala—New school building, \$1500. The present school grounds and buildings are the property of the Meyer brothers and have been given to this department free of charge for school purposes for several years. They have offered to exchange the land and buildings for an old school site near by, asking a bonus of \$400 in cash.

Kaunakakai—New 1-room schoolhouse, \$1500. Tentative arrangements have been made with the Molokai Ranch Company for an exchange of the present school lot for land farther mauka where we hope to be able to sink a well and get good water. There is no water at all on the present school premises. The present premises are an old church and school lot and I have suggested to the Hawaiian Board the advisability of making an exchange with

WINTER LEAGUE'S SCHEDULE.

SCHEDULE OF GAMES	WINTER LEAGUE	MAUI ATHLETIC ASSOCIATION.
1907	1 30 P. M.	3 30 P. M.
November 3	Stars vs Healan	Waikapu vs Kahului
" 10	Stars vs Waikapu	Healan vs Kahului
" 17	Waikapu vs Healan	Stars vs Kahului
" 24	Stars vs Healan	Waikapu vs Kahului
December 1	Stars vs Waikapu	Healan vs Kahului

the ranch people whereby we can get a lot of the same size—nearly two acres—and permit the church people to remove their edifice to the same place.

Kamalo—Teacher's cottage, \$1000. Before proceeding with any of the Molokai buildings, it is desirable that all old church and school lots on this island be surveyed and located by the Survey Office and arrangements have been practically completed with Mr. Wall for having this work done.

Total for Maui, \$40,000.

HAWAII.

Ainaka—5 or 6 room building, \$600. It is possible that a proposition will be made to the residents of this section to make a central school at Ainaka to accommodate both the Ainaka and Honomakau children.

Honomakau—Additional room, \$1500. Should the proposition mentioned be adopted, this \$1500 will probably be used to increase the size of the new Ainaka building.

Honokaa—New 5 or 6 room schoolhouse and enlarge cottage, \$6000. This department owns a very desirable school lot in Honokaa on which the teachers' cottage is now located. The school building is on other and undesirable grounds. An attempt will be made to get additional land mauka of the lot owned by this department.

Paoulo—New 5 or 6 room schoolhouse, \$6000. Here additional land is needed and arrangements have been practically completed with T. H. Davies & Co., agents for the plantation, for the acquisition of this land.

Pepeekeo—2 or 3 room schoolhouse and new teachers' cottage, \$4500. A proposition will be put before the people there for the erection of a new building on an entirely different site on the government road. The present school premises are on the road leading from the main road to the mill. With the other location it would be possible later to unite the Pepeekeo and Onomua schools.

Waialea uka—New schoolhouse, \$1500. This building is to be erected on the new site already transferred from the Waialea plantation company to this department.

Waiohinu—New teachers' cottage, \$2500. This amount will possibly not be needed as with the repair fund we have made an unused portion of the present school building into teachers' quarters. And with the renewed interest shown on the part of the Catholic school at Naalehu, it will not be necessary to have a new building.

Alae—New 2 room schoolhouse and teachers' cottage, \$3000. A new site is imperatively needed here. The department has no title to the present school lot and a more desirable location should be chosen.

Total for Hawaii, \$43,500.

To Increase Size of Leprosarium.

Dr. Brinckerhoff called on Governor Frear this morning and discussed the matter of the building of the leprosarium at Kalawao. He says that Mr. Peters, the architect, who is to have charge of the work, will the down within a short time, probably on the next steamer, and bids will be called for immediately.

The leprosarium will be built on a larger and more complete scale than was contemplated. The first plans drawn and submitted called for the expenditure of more money than was appropriated by Congress and it was necessary to have another set of plans drawn in a cheaper scale. But this second set also brought the cost up above the amount of the appropriation and were rejected.

Now Dr. Brinckerhoff, stated to the Governor, it has been decided to go back to the first set of plans and to build as far as the money on hand will allow. Then Congress will be asked for more to finish the work.

The construction of the leprosarium has been turned over to the Marine Hospital Service, which Governor Frear says will greatly expedite matters and do away with a large amount of the redtape that usually delays such work.—Bulletin

Objects to War.

The Evening Bulletin reprints the following editorial from an eastern paper. It gives the most sensible reasons for peace that we reprint the article.

As we understand the present idea in regard to war, it is this: That if the American army or navy or both capture a fort or city or enter upon any territory of the nation with which we are at war and erect an American flag at the place of victory or entry, we are obliged to retain the territory over which the flag floats and so much of the territory contiguous thereto as it not occupied by some nation of the first class, as a part of United States, until we are satisfied that the inhabitants occupying said territory are entirely capable of governing themselves in a manner satisfactory to us.

It is not a very old doctrine, but is a generally accepted one at present. It was first promulgated at the close of the Spanish war, when it was seriously argued that because Dewey had captured Manila it became necessary for us to buy the Philippine Island and govern them for an indefinite period. Any other policy was said to be the "policy of scuttling." Opponents of the scheme were asked indignantly and horrified if they dared haul down that flag? And when the interrogator emphasized the question by pointing at the Stars and Stripes neatly draped over a settee on the back of the stage, the applause was tremendous.

True, the American flag had floated over the cities of Mexico and Vera Cruz and had been hauled down without anyone suspecting that there was dishonor in the act; true, the American navy had successfully bombarded Tripoli without anyone suggesting that the act compelled us to undertake the benevolent assimilation of Northern Africa, but those things happened away back in the stage coach era when things were different.

As matters stand at present if war with Japan occurred and our fleet should capture Yokohama, and our army should be generally successful, it would become our duty to first buy Japan and then annex it to this country. As Korea is now governed by a Japanese protectorate, we should be forced to take that also, and while such an ending to the difficulty would make us still more of a world power than we now are, it would complicate to some extent our problems of government.

When it is assumed that a conquered nation must at the close of hostilities be at once annexed to the conquering nation, one sees at a glance that war should never be declared excepting against a people whom we should consider desirable citizens, and who are highly enlightened, thoroughly civilized and possessed of at least as much virtue and good sense as ourselves.

We have understood that the sole complaint which Japan has made against the United States is that we refuse to receive certain of her citizens as citizens of our country. A war will take care of that all right. At the close of it we will be compelled to admit every Japanese in the empire as a citizen of the United States, pay for the territory, give them all the water cure and Mr. Taft or some other good man out to govern them, but we do not look forward with pleasure to such a result, consequently we hope that there will be no war.
